ENVIRONMENT TRAIL

The Department of Finance is working to promote and enhance the Stormont Estate as a visitor and tourist attraction and has created a series of adventure trails to showcase the rich biodiversity of the woodlands and to give visitors a brief insight into the history of the Estate. Each trail can be navigated using a trail map. There are four trails, a woodland trail, an environment trail, a history trail and a bug safari trail suitable for all age groups. **Adventure awaits, go find it.**

Can you help us find the answers to the clues to the Environment Trail?

We have developed a trail for you to explore using your navigational skills and powers of observation. We need you and your friends to locate all 9 clues, answer the questions and solve the final answer.

Using the map, make your way around each of the locations. Each location can be found easily and has a question linked to it.

Answer the question on your sheet. Each shaded letter will be used to make up your final answer. Once you have solved all the clues, write the letters into the final answer grid.

Remember that you are responsible for the safety of yourself and others in the group while on the trail. Do not allow your children to go ahead and separate from the group. Don't forget to respect the privacy and property of others. Before you begin, agree on an emergency rendezvous point should someone become separated.

ENVIRONMENT TRAIL

1

How many gallons of water can oak trees absorb daily?

— — — — —

2

How many years does it take for a bluebell seed to grow into a bulb?

— — — — —

3

What colour is a robin's tummy?

— — — — —

4

Ivy is great at purifying what?

— — — — —

5

How many inches tall can pink clover plants grow to?

— — — — —

6

Many pigeons are grey, black, white or what other colour?

— — — — —

7

Maple tree bark gets rough as the tree grows...?

— — — — —

8

Buttercups begin to flower in what month?

— — — — —

9

What do Herons mainly eat?

— — — — —
