

2026 Northern Ireland (Rea's Wood) Bathing Water - Weekly Results

BATHING NOT ADVISED

For 2026 bathing Season – 1st June 15th sept

POOR WATER QUALITY

Weekly results

Individual sample results ≤ 500 E.coli (EC)/100ml and ≤ 200 Intestinal Enterococci (IE)/100ml are typical of an **Excellent** classification. Results $> 500 - \leq 1000$ EC/100ml and $> 200 - \leq 400$ IE/100ml, are typical of a **Good** or **Sufficient** classification. When E.coli levels exceed 2250/100ml **temporary advice against bathing** will be issued.

Scan QR code to access results on the NI Bathing Water Dashboard.

Blue-green algae

***Blue-green algae** has been found at this bathing water. Levels have exceeded those of agreed health guidelines for safe bathing. 'Advice against bathing' has been issued and signage erected.

Scan QR code to find out more about blue-green algae.
